
FIRE, TECHNICAL RESCUE & EMERGENCY RESPONSE

VERTEX OUTFITTERS

GO WHERE OTHERS WON'T

WELCOME

BUILT FOR THE TEAMS THAT GO IN.

This catalog is for urban search and rescue task forces, fire departments, technical rope and confined-space rescue teams, swiftwater crews, police tactical teams that work at height, and the search and rescue and wildland units that support them.

It covers helmets, eye and hearing protection, and impact and rope gloves; rescue harnesses, back-up and escape systems; NFPA-rated rope, carabiners, pulleys, descenders and rigging; confined-space tripods, davits, winches and ventilation; litters; swiftwater gear; scene lighting; and field portable sanitation for long deployments.

Start with **Shop by Discipline** to see what a team in your discipline typically carries, then go to the product pages. Questions? Email **info@vertexoutfitters.net** or call **301-246-2336**.

SDVOSB **Service-Disabled Veteran-Owned**	MD VSBE **#89150**
UEI **WVWHBNHDUTW6**	CAGE **16MC9**

HOW TO READ A PRODUCT

NFPA G EN 362 Green tags are standards the maker lists for the product. 40 kN Dark tags are published strengths. USE Gray tags are size, pack or type notes. Item numbers are Vertex SKUs — search any of them on vertexoutfitters.net.

USAR

Structural collapse, breaching and heavy rescue: impact gloves, NFPA 1951 helmets, rope systems, litters and long-deployment support.

SEE PAGE 05

ROPE & TACTICAL

High-angle, rope access and police tactical teams working at height: harnesses, G- and T-rated rope, descenders and edge protection.

SEE PAGE 08

CONFINED SPACE

Permit-space entry and rescue: tripods, davits, 3-way SRLs, wristlets, narrow litters and blowers.

SEE PAGE 09

SWIFTWATER

Shore-based and in-water rescue: throw bags, water helmets and gloves, ice suit, rescue board and floating litters.

SEE PAGE 10

SAR, WILDLAND & FIRE

Search lines, escape systems, personal and scene lighting, and the field support teams need on long operations.

SEE PAGE 12

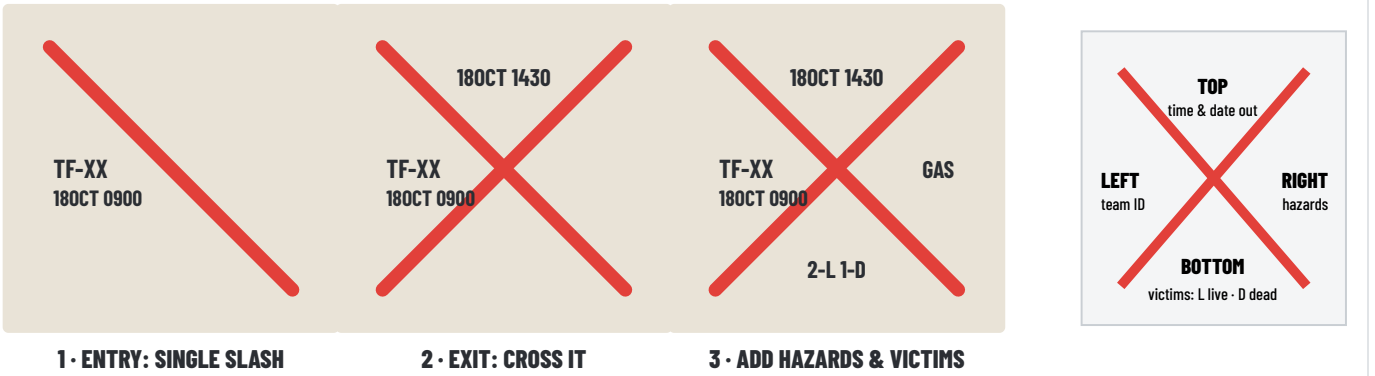
FIELD SANITATION

An all-in-one toilet system that packs into one backpack, plus the refills that keep it running.

SEE PAGE 83

USAR & STRUCTURAL COLLAPSE // TASK FORCE KIT

Collapse search, shoring support, breaching, rope systems and patient packaging — often far from resupply.



Search assessment marking. Our illustration of the structure/search marking practice used by US&R teams: paint a single slash on entry with team ID and entry time, cross it on exit with the exit time, and add hazards (right) and victim counts (bottom). Follow your task force SOG and current FEMA US&R field guidance — formats are updated.

THE USAR RESCUER // HEAD TO TOE

What each rescue specialist wears on a collapse site, and where to find it in this catalog.

HEADLAMP
Hands-free light for voids. Page 82.

NFPA 1951 HELMET
Built for collapse and technical rescue. Page 14.

SEALED GOGGLES
Gasketed against concrete dust. Page 19.

HEARING PROTECTION
Plugs for the shift, muffs for saws and breakers. Page 23.

RESPIRATORY PROTECTION
Dust mask or APR as your program requires.

CLASS III HARNESS
Rope work, lifts and void entry. Page 26.

IMPACT GLOVES
Back-of-hand impact, cut and puncture ratings. Page 2[illegible].

ROPE GLOVES
Leather for belay, rappel and rigging. Page 22.

KNEE & ELBOW PADS
Kneeling on rubble and rebar; per your task force list.

WHY HEARING PROTECTION IS ON THE LIST

Collapse rescue means breaching and breaking concrete, cutting steel and running saws, generators and compressors for hours. State structural collapse technician courses list hearing protection with leather gloves and respiratory protection, and OSHA found hearing protection was often missing on disaster debris sites when it was needed. Issue plugs to everyone; give saw and breaker operators helmet-mounted muffs as well.

USAR // BREACH, SHORE, LIFT & SUSTAIN

Collapse-rescue operations and the gear in this catalog that supports each one.

BREACHING & BREAKING

Bear Knuckles Sledgehammer SU375	p. 21

NRS Tactyl Rescue Helmet	p. 18
NRS Reactor Rescue Gloves	p. 22
KONG 911 HIVE	p. 74
Junkin JSA-303 Flotation Collar	p. 75

CACHE PLANNING

- Plan the cache to be self-sufficient for at least 72 hours: lighting, sanitation, meals and spares.
- Mark equipment by task force and cache number; carabiners with NFC chips (KONG i-Ovalone) make inspection logs faster.
- Hurricane and flood deployments mix collapse and water work — pack swiftwater PPE for the water-rescue component.

ROPE RESCUE & TACTICAL AT HEIGHT // HIGH-ANGLE KIT

For fire department high-angle teams, rope access rescue and police tactical teams that insert, rappel or recover from height.

HELMET & GLOVES

Petzl VERTEX VENT	p. 15
Petzl STRATO VENT	p. 15

THE SWIFTWATER RESCUER // HEAD TO TOE

What each water rescue technician should carry before working near moving water.

EN 1385 WATER HELMET
Drains fast and will not soak up water. Page 18.

RESCUE PFD
Quick-release belt for tethered work; the KONG kit includes a 150N AutoLife. Page 78.

WATER RESCUE GLOVES
Grippy palms or 2 mm neoprene. Page 22.

FOOTWEAR & THERMAL
Water shoes; drysuit or ice suit for cold water. Page 78.

RESCUE KNIFE
Reachable with either hand to cut entanglements. Page 78.

THROW BAG
On the PFD or belt, ready to deploy. Page 78.

WHISTLE & LIGHT
On the PFD: signal the team when you cannot shout over the water.

FLOODS ARE USAR WORK TOO

Hurricane and flood deployments put collapse teams in moving water. Every member working near the water needs a helmet, PFD, knife and throw bag, even if their main job is search or structural triage. Hearing protection is not needed for water work and gets in the way of hearing shouted commands.

SAR, WILDLAND & FIRE SUPPORT // FIELD KIT

Search lines and escape systems for structure fire; lighting and field support for search and wildland operations.

FIRE SEARCH & ESCAPE

Sterling Rope FDNY Large Area Search Kit	p. 47
Sterling Rope SearchLite 7.5 mm Search Rope	p. 46

WILDLAND NOTE

For wildland crews we carry the Bear Knuckles Bushwhacker HD361, a heavy buffalo-hide glove built for fireline construction and hand tools, and the FoxFury Wildland Fire Lighting Kit. Vertex does not currently list NFPA 1977 certified wildland helmets or gloves; check your agency's requirements before you order fireline PPE.

RESCUE HELMETS · EYEWEAR · IMPACT & ROPE GLOVES

HEAD, EYE & HAND

NFPA 1951 rescue helmets, climbing-style work-at-height helmets and water-rescue helmets; ballistic eyewear and sealed goggles for collapse dust; impact gloves for USAR and leather rope gloves for belay and rappel.

PMI | Petzl | KONG | Singing Rock | HexArmor | Bear Knuckles | NRS | WRSI | Wiley X | Magid | CMC

RESCUE HELMETS // WHICH STANDARD FITS THE JOB

Many helmets carry several marks. Match the standard to the hazard — collapse, rope, electrical or water — and to your department's policy.

Standard	What it covers
NFPA 1951	Technical rescue protective ensembles. Helmets tested for rescue and recovery work — the reference standard for many USAR and fire rescue teams.
ANSI/ISEA Z89.1	US industrial head protection. Type I (top impact) or Type II (top and side); Class G, E or C for electrical protection.
EN 12492	Mountaineering helmets: side, front and rear impact plus a chin strap that stays on in a fall. Common on rope rescue helmets.
EN 397	European industrial safety helmet; chin strap releases under load to prevent strangulation.
EN 50365	Electrically insulating helmets for work on low-voltage installations (up to 1,000 V AC).
EN 1385	Canoe and whitewater helmets — the water-rescue helmet standard.
EN 443	Firefighting helmets for buildings and structures.

PMI

PACIFIC KIWI USAR HELMET

NFPA 1951 · ANSI Z89.1 · EN 443

Built to NFPA 1951 for technical rescue: structural-collapse, USAR and rescue-and-recovery work.

ITEM # V0-PMI-HL33037 / 33038 / 33039 / 33041

COLORS Red · Black · Yellow · White

PMI

ADVANTAGE KEVLAR RESCUE HELMET

NFPA 1951 · ANSI Z89.1 · EN 397

Kevlar shell, ratchet headband, 3-point chin strap, headlamp retainer and goggle mounts. 52–64 cm.

ITEM # V0-PMI-HL33011 – 33035

COLORS Red · Orange · White · Blue · Matte Black · Fluorescent Green

PMI

IMPACT ANSI HELMET

ANSI Z89.1 · EN 397 · EN 12492

Type I Class C vented helmet with increased side-impact protection (per PMI) and a micro-peak brim.

ITEM # V0-PMI-HL33093 / 33094

COLORS Hi-Viz Yellow · Hi-Viz Orange

PMI

E-GO ANSI HELMET

ANSI Z89.1 · EN 397 · EN 50365

Electrically rated (E) rescue and work-at-height helmet for high-voltage exposure.

ITEM # V0-PMI-HL33095

PACIFIC

R6 CHALLENGER HELMET

ROPE RESCUE

Lightweight, low-profile multi-purpose helmet with integrated retention and reflective detail.

ITEM # V0-PMI-PNZ1091019 – 1091022

COLORS Red · Green · White · Black

PACIFIC

R6L PATROLLER HELMET

KEVLAR · PICATINNY

Kevlar/fiberglass shell with Picatinny rails and VAS shroud for lights, cameras and NVG.

ITEM # V0-PMI-R6L-SATBLK / -SATRED / -SATRESBLU

COLORS Satin Black · Satin Red · Satin Rescue Blue

PETZL HELMETS // VERTEX & STRATO

The rope-rescue standard: ANSI Z89.1 Type I plus EN 12492, with slots for Petzl visors, muffs and comms.

PETZL

VERTEX VENT

ANSI Z89.1 · EN 397 · EN 12492

Type I Class C. Six-point textile suspension, CENTERFIT wheels, sliding vent shutters.

ITEM # VO-VSG-VTVA-BK series

COLORS Green · Yellow · Orange · Red · White · Blue · Black

PETZL

VERTEX VENT HI-VIZ

ANSI Z89.1 · EN 397 · EN 12492

Hi-viz VERTEX VENT with reflective bands for night and roadside operations.

ITEM # VO-VSG-VVHA-OR / -YL

COLORS Yellow · Orange

PETZL

STRATO VENT

ANSI Z89.1 · EN 397 · EN 12492

Lightweight vented helmet; order bare or with SENA Work4 / 33i comms.

ITEM # VO-VSG-STVA-BK series

IMPACT GLOVES // ANSI/ISEA 138

Back-of-hand impact protection is rated Level 1 to 3; Level 3 lets the least force through. USAR teams pick impact gloves for breaching, shoring and debris removal, where hands meet concrete, rebar and timber.

CUT & PUNCTURE // ANSI/ISEA 105

Cut is rated A1 (200 g) to A9 (6,000 g); puncture 1 to 5. A high cut level does not mean puncture or impact protection — check every tile.

ROPE GLOVES

Leather rope gloves are built for belay, rappel and rigging: abrasion and heat from the rope, and the feel to work carabiners. They are not impact gloves. Most teams carry both.

IMPACT GLOVES // USAR, EXTRICATION & HEAVY RESCUE

Tags show the maker's ANSI cut, puncture and impact ratings.

BEAR KNUCKLES

SLEDGEHAMMER SU375

HEARING PROTECTION // USAR NOISE

USAR teams cut concrete and steel, break slabs and run saws, generators and compressors. Protect hearing on the pile and at the base of operations.

Where	Noise sources	Start with
On the pile	Breakers, rotary hammers, concrete and rescue saws, metal cutting	Plugs for everyone plus helmet muffs for operators
Shoring & cutting station	Chop saws, circular saws, nail guns	Corded plugs that hang at the neck between cuts
Base of operations	Generators, compressors, light towers	Over-the-head muffs or disposable plugs
Confined space	Blowers and tools in an enclosed space	Plugs under the helmet; muffs only if they don't snag

3M PELTOR
HI-VIZ HELMET MUFFS
PMI HELMETS

Low-profile muffs; fit PMI Advantage with the clip set.

ITEM # V0-PMI-HL33042

CHECK BEFORE YOU ORDER

- Match helmet muffs to the helmet: Ceros K-Series for HexArmor Ceros, KONG Peltor plus MOUSE Plates (page 20) for KONG MOUSE, Singing Rock SECURE for FLASH and BLAST, Peltor Hi-Viz plus clip set for PMI.
- Size plugs: accuFit comes in three sizes so every member gets a seal.
- OSHA 1910.95 and 1926.52 set noise exposure limits; follow your department's hearing conservation program.
- Not needed for swiftwater — rescuers must hear shouted commands.

RESCUE HARNESSES · VICTIM HARNESSES · BACK-UP · ESCAPE

HARNESSES & FALL PROTECTION

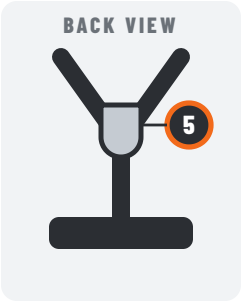
Class III life-safety harnesses for rope and confined-space rescue, heli-rescue and rope-access harnesses, victim harnesses and evacuation triangles, rope back-up devices and personal escape systems.

PMI | CMC | KONG | Singing Rock | Petzl | BEAL | FrenchCreek | SKYLOTEC | ISC | SMC

HARNESS ATTACHMENT POINTS // USE EACH ONE RIGHT

Rescue harnesses carry more than one connection point. Use each one only for what the maker rates it for.

Shown: PMI Avatar Deluxe, page 26



1. **STERNAL (CHEST)**
   Fall arrest and rope ascending on harnesses rated for it; keeps you upright.
2. **VENTRAL (FRONT WAIST)**
   Main point for rappel, belay and work positioning on rope.
3. **SIDE D-RINGS**
   Work positioning only — always pair with a fall-arrest connection.
4. **SHOULDER RINGS**
   On harnesses rated for it (PMI CS Tech, Singing Rock Expert 3D), used with a yoke or spreader for confined-space retrieval. Not shown: the Avatar Deluxe's shoulder points are lanyard parking only.
5. **DORSAL (BACK)**
   Fall arrest point on every full-body harness; also used for vertical retrieval.
6. **LEG LOOPS & SEAT**
   Carry the load in suspension. Padding matters on long hangs.

NFPA LIFE-SAFETY HARNESS CLASSES

Under NFPA (now NFPA 2500, which incorporates NFPA 1983), a **Class II** harness is a seat harness that fastens around the waist and thighs; a **Class III** harness fastens around the waist, thighs and over the shoulders and is the choice when a rescuer could be inverted. The PMI Avatar Deluxe, PMI CS Tech and Singing Rock Expert 3D in this section are listed as Class III / NFPA. Fall arrest in industry is governed separately by ANSI Z359.11.

CHECK BEFORE YOU ORDER

- Size every rescuer — most rescue harnesses come in two or three sizes; see the options under each item.
- Confined-space teams: a harness with shoulder points (PMI CS Tech, KONG ITAKA) works with the yokes and DIAPASON spreader on page 68.
- Work over water: the FrenchCreek 631LJ combines a harness and a USCG Type III PFD.
- Retire any harness that has arrested a fall, and inspect before every use.

NFPA LIFE SAFETY ROPE · FIRE SEARCH & ESCAPE · WEBBING · CORD

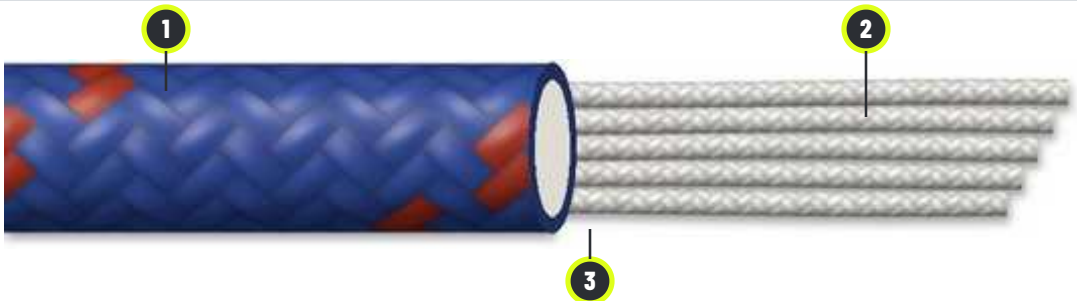
ROPE, CORD & WEBBING

General-use and technical-use life safety rope from PMI and Sterling Rope, rope-access statics from Armbury, BEAL, KONG and Singing Rock, Berry-compliant black rope for tactical teams, firefighter search and escape lines, tubular webbing, prusik cord and rope-care tools.

PMI | Sterling Rope | Armbury | BEAL | Singing Rock | KONG | Samson | Teufelberger | Cypher | Edelweiss | Maxim

LIFE SAFETY ROPE // G, T AND ESCAPE

Kernmantle rescue rope is a load-bearing core inside a braided protective sheath. NFPA sorts life safety rope by minimum breaking strength.



1 SHEATH (MANTLE)
Braided cover that resists abrasion, heat and dirt. Takes the wear — inspect it every use.

2 CORE (KERN)
Carries most of the load. Parallel strands give low stretch.

3 DIAMETER
1/2 in. (12.5 mm) and 7/16 in. (11 mm) are the classic G and T sizes; lighter lines for packs.

NFPA designation	Rope minimum breaking strength	Typical use	Matching hardware
General Use (G)	40 kN (8,992 lbf)	Two-person rescue loads with the traditional 15:1 margin; fire department and USAR main and belay lines.	G carabiners 40 kN; G pulleys 36 kN
Technical Use (T)	20 kN (4,496 lbf)	Lighter, smaller systems for trained technical teams; rope access style rescue.	T carabiners 22 kN; T pulleys 18 kN
Escape	13.5 kN (3,034 lbf)	Single-person, one-time emergency self-rescue from a structure.	Escape-rated systems only

Rope requirements: NFPA 1983, now incorporated in NFPA 2500 (2022). Hardware figures are current NFPA 1983 minimums as incorporated in NFPA 2500 (carabiners: major axis, gate closed); older 2012-edition labels used 27 kN (T carabiners) and 22 kN (T pulleys). Older labels read "NFPA 1983 (2017) (G)"; newer labels read "NFPA 2500 (1983) 2022 ED (G)" — the G, T or E is what to look for. Check the label and the maker's data on every item you put in a system.

CHECK BEFORE YOU ORDER

- Pick the rope class first, then build the system from hardware with the same or higher rating.
- Order main and belay lines in different colors so the team can call them by color.
- Log each rope: date in service, uses, loads, inspections. The PMI Rope ID Kit and Cordage Meter are on page 48.
- Rope construction is explained on page 33; millimeter-to-inch sizes are on page 34.
- Remove from service any rope that has been shock-loaded, cut, glazed, chemically exposed, or that fails inspection.

ROPE CONSTRUCTION // WHAT IS INSIDE

The sheath protects the rope; the core carries the load. How the core is built decides how much the rope stretches and what it is for.

STATIC KERNMANTLE

Parallel nylon core bundles carry the load with very little stretch; the braided sheath protects them. The standard rescue mainline and belay rope.

WE CARRY PMI EZ Bend, Sterling SuperStatic2, KONG FORZA

UNICORE (BONDED)

The sheath is bonded to the core, so it cannot slide along the core. If the sheath is cut, it does not strip back and leave the core bare.

WE CARRY PMI EZ Bend with Unicore, PMI Extreme Pro, BEAL Access Unicore, Armbury STATIC 11 INTERCORE

ISOSTATIC POLYESTER

Polyester sheath and core. Stretches even less than nylon static and loses less strength when wet. Built for tensioned highlines and track lines.

WE CARRY PMI 11.5 and 13 mm Isostatic

HEAT & ABRASION SHEATH

A sheath made with heat- and cut-resistant fibers over a static core. For sharp edges, hot surfaces and fire-ground work.

WE CARRY PMI Dura-Shield, Armbury GUARDIAN 11

DYNAMIC KERNMANTLE

Twisted core bundles stretch to soak up a climbing fall. Too stretchy for rescue mainlines and hauling, so we do not list them for rescue systems.

WE CARRY Climbing ropes (shown for comparison)

WATER RESCUE ROPE

Polypropylene floats, so the line stays on the surface where it can be thrown and seen. Some ropes are all polypropylene; the Armbury WRL pairs a polypropylene sheath with a polyamide core for strength. For throw bags and tag lines, not for life-safety rope systems.

WE CARRY Armbury WRL 10 mm (page 79), NRS throw bags (page 78)

ROPE DIAMETER // SIZE CONVERSION

Rope is sold in millimeters and inches. The circles below are drawn at true diameter so you can hold a rope against the page.

PRINT AT 100% SCALE — NO AUTO PAGE RESIZING. In the print dialog choose "Actual size" or 100%, not "Fit" or "Shrink to page". On screen, the circles are not to scale.

Check: this bar measures 50 mm (1.97 in.)

12.5 mm	0.492 in.	1/2 in.	31/64 in.	NFPA G main and belay	PMI 12.5 mm EZ Bend, Extreme Pro, Sterling 1/2 in.
13 mm	0.512 in.	1/2 in. +	33/64 in.	Heavy isostatic	PMI 13 mm Isostatic

CHECK BEFORE YOU ORDER

- Match prusik diameter to the rope: about 8 mm on 12.5 mm rope, 7 to 8 mm on 11 mm rope. Too thin grabs hard; too thick slips.
- Check every device for its rated rope range before you buy rope. Descenders and rope grabs are certified for set diameters.
- Diameter is nominal. New rope can measure a little over, and rope shrinks a little with use and washing.
- Webbing is sold by width: 9/16 in. (14 mm), 1 in. (25 mm) and 2 in. (50 mm). Tubular 1 in. webbing is the rescue standard for anchors and harnesses.

GENERAL USE RESCUE ROPE // NFPA G

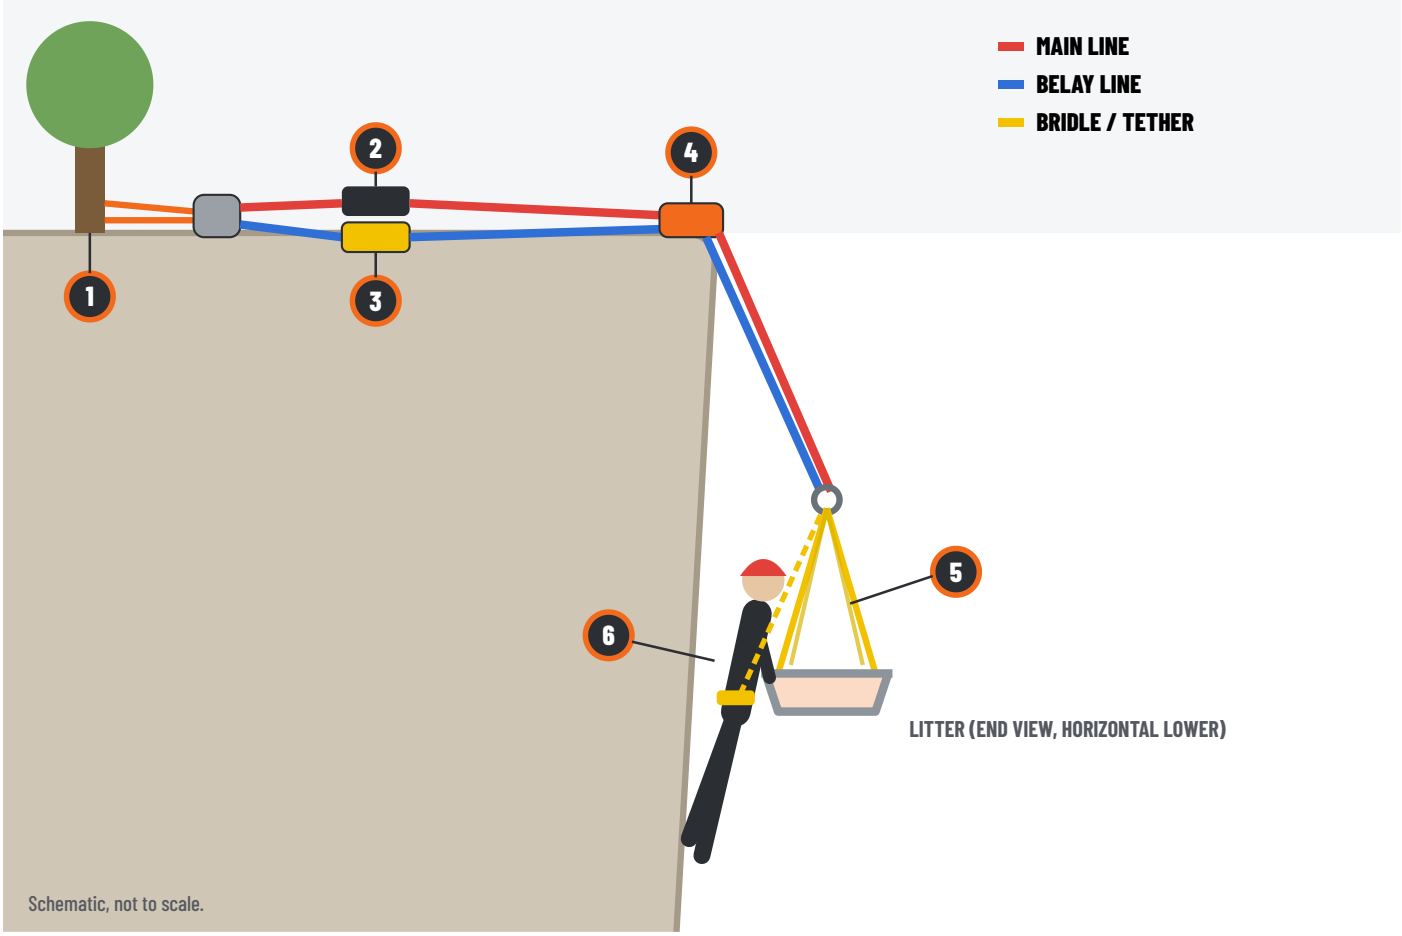
HARDWARE & RIGGING

NFPA general-use and technical-use connectors, rigging plates and swivels, progress-capture pulleys and haul kits, racks, figure 8s and auto-locking descenders, ascenders, edge rollers and rope bags.

CMC | SMC | Petzl | KONG | Rock Exotica | ISC | DMM | CMI | Conterra | PMI | Sterling Rope | Armbury

ROPE RESCUE SYSTEMS // LOWER, RAISE & HIGHLINE

Our drawings of the systems this hardware builds. Each number points to the product group that does the job.



1 ANCHOR & RIGGING PLATE
Bombproof anchor, anchor sling and a G-rated rigging plate gather the system (page 57).

2 MAIN LINE & DESCENT CONTROL
Rack or auto-locking descender on the main line for the lower (page 60).

3 BELAY & BACK-UP
Independent belay line with a back-up device or tandem prusiks (page 30).

4 EDGE PROTECTION
Rollers or edge pads keep both lines off the lip (page 62).

5 LITTER BRIDLE
Main and belay lines both connect to the bridle's attachment point; the bridle legs set the litter level (page 75).

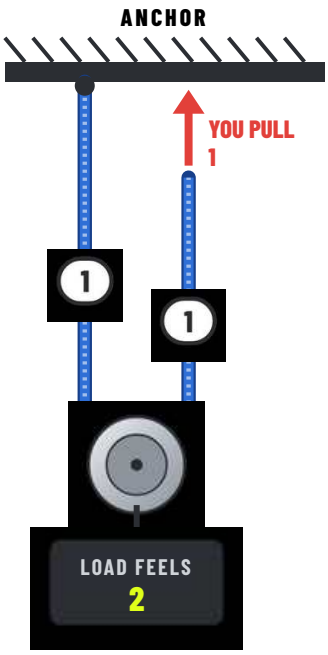
6 LITTER ATTENDANT
Attendant on an adjustable tether to the bridle attachment, feet on the wall, keeps the litter off the face.

General guidance only. Rope rescue systems must be built and operated by trained personnel following NFPA 2500 and your agency SOPs.

HAUL SYSTEMS & HIGHLINES

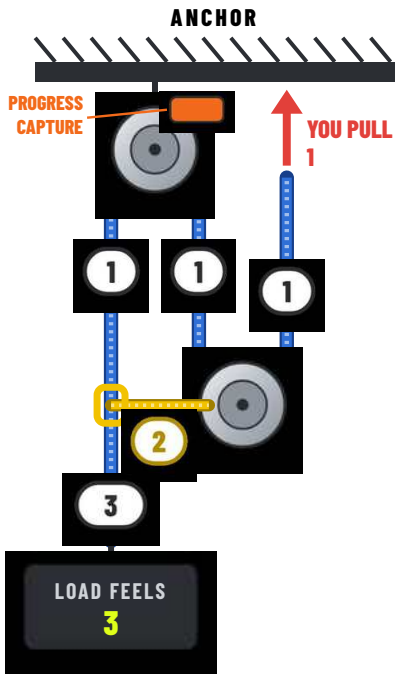
More MA lifts heavier loads with fewer haulers, but you pull more rope for every foot the load moves. Real pulleys lose some to friction, so you get a little less than the number.

HOW TO READ IT The numbers are how hard each rope pulls. You pull with **1**. A rope keeps its number as it runs around a pulley. Where two ropes meet at a prusik or pulley, add them. The number at the load is the mechanical advantage (MA).



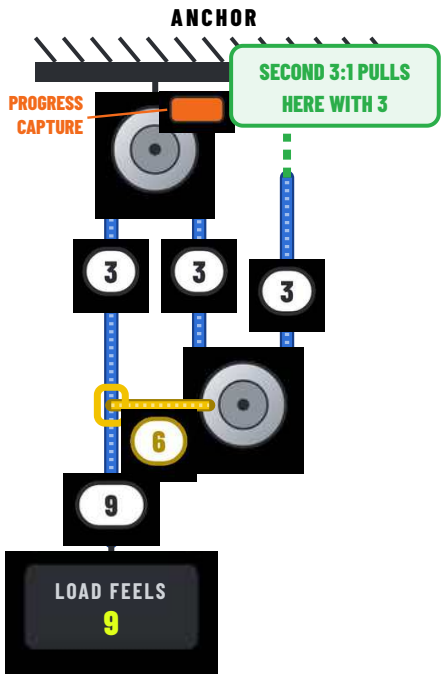
2:1 SIMPLE

Pulley rides on the load.
Pull 2 ft of rope, load moves 1 ft.



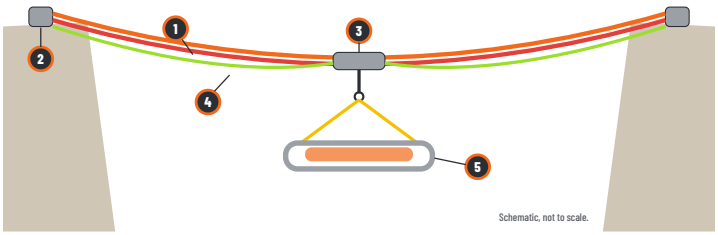
3:1 Z-RIG

Prusik + pulley grab the main line.
Pull 3 ft of rope, load moves 1 ft.



9:1 COMPOUND

A 3:1 pulling on a 3:1: 3 × 3 = 9.
Pull 9 ft of rope, load moves 1 ft.



1 TRACK LINES
Two tensioned lines carry the load across the gap — low-stretch rope like PMI Isostatic.

2 ANCHORS
Full-strength anchors on the near and far sides.

3 CARRIAGE
Highline pulley or trolley (Petzl REEVE, DMM Keanu, KONG PAMIR).

4 TAG LINES
Control lines move the carriage across the span.

5 LITTER & BRIDLE
Bridled litter hangs from the carriage.

Simplified. Track-line tension and anchor loads rise sharply as sag decreases; highlines must be designed and run by a trained team.

BUILDING A HAUL

- Progress capture (PRO TRAXION, MINI TRAXION, FUTURA MINI BLOCK) holds the load between strokes.
- Prusik-minding pulleys work with tandem prusiks; check the sheave diameter for your rope.
- Pre-rigged haul kits — Petzl JAG, KONG HOP!, NRS Z-Drag — save setup time.

FEATURED PULLEYS // PROGRESS CAPTURE

The two capture pulleys most haul systems in this catalog are built around. Shown large.

PETZL

PRO TRAXION

NFPA 2500 EN 567 EN 12278

NFPA 2500

Progress-capture pulley with swivel.

- Progress-capture pulley with swivel; NFPA 2500, EN 567 and EN 12278 per Petzl listing.
- Use as the capture point in Z-rigs and compound systems (page 51).
- Check the rope diameter range in Petzl's instructions.

ITEM # V0-VSG-99372

PETZL

MINI TRAXION

NFPA 2500 EN 567

NFPA 2500

Compact progress-capture pulley.

- Compact progress-capture pulley for light kits.
- NFPA 2500 and EN 567 per Petzl listing.
- Check the rope diameter range in Petzl's instructions.

ITEM # V0-VSG-99371

Callouts name features listed by the maker. Check the maker's instructions for ratings and compatibility before use.

CARABINERS & CONNECTORS // READ THE SPINE

Every carabiner is strongest along its spine with the gate closed and locked. Match the rating to the system: G or T.

1 SPINE
Load along the spine — the major axis.

2 BASKET
Where the rope or sling sits.

3 GATE & NOSE
Keylock noses don't snag; keep the gate off edges.

4 LOCKING SLEEVE
Screw, twist (auto) or triple-lock.

5 GATE HINGE
Bottom of the gate. Keep it free of grit so the gate snaps shut.

6 MAJOR AXIS RATING
The kN stamped on the spine. NFPA G = 40 kN, T = 22 kN minimum.

LOAD THE SPINE
Major axis, gate closed and locked.

GATE OPEN
Strength drops to a fraction of the rating.

CROSS-LOADED
Minor-axis loading: far weaker.

THREE-WAY LOAD
Use a rigging plate instead.

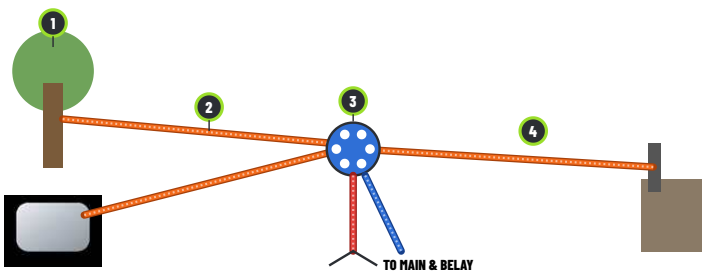
OUR DRAWING
LOAD-DISTRIBUTING ANCHOR



1. **NATURAL ANCHOR**
   Tree, column or structural member, wrapped with an anchor sling (page 58).
2. **ANCHOR LEGS**
   Two or three legs share the load; keep the angle between legs narrow.
3. **RIGGING PLATE**
   The plate gathers the legs and gives clean attachment points for main and belay (page 57).
4. **PICKET OR STRUCTURE**
   Add legs until the anchor is bombproof.

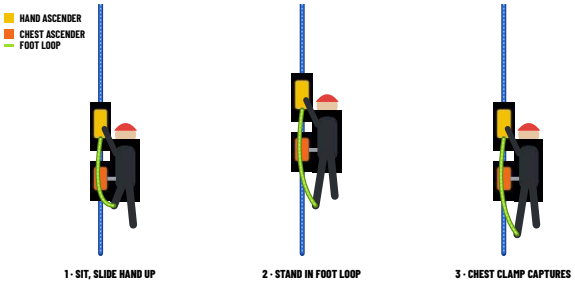
OUR DRAWING

ASCENDING A FIXED LINE // SIT-STAND



A hand ascender with foot loop and a chest ascender let a rescuer climb a fixed line: sit back on the chest ascender, slide the hand ascender up, stand in the foot loop, and the chest ascender captures the progress. Hand, chest and foot ascenders are on page 61.

TRIPODS · DAVITS · RESCUE SRLs · WINCHES · VENTILATION

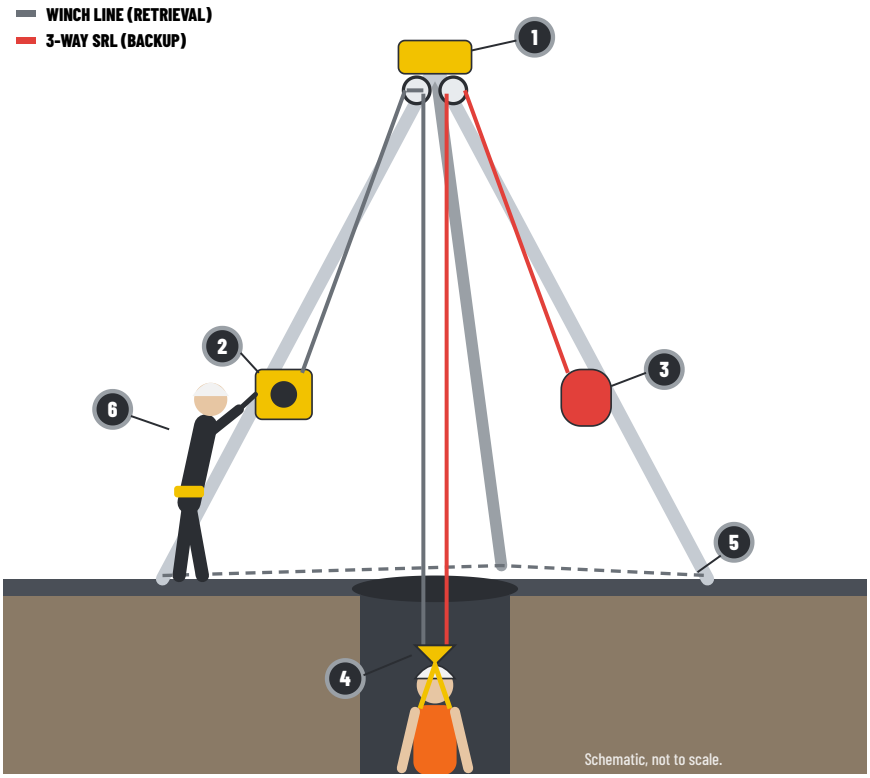
CONFINED SPACE

Non-entry retrieval and entry rescue for manholes, vaults, tanks and below-grade collapse voids: tripods and davits, 3-way rescue SRLs and winches, wristlets and yokes, and the blowers that keep the air moving.

FrenchCreek | 3M DBI-SALA | KONG | SMC | Petzl | Allegro

TRIPOD RESCUE SYSTEM // NON-ENTRY FIRST

Our drawing of a typical tripod rescue setup over a vertical entry. Retrieval from outside the space is the first choice; an entry rescue team goes in only when it can't be done.



1. **TRIPOD HEAD & SHEAVES**
   Overhead anchor centered on the opening; each line runs over its own sheave (page 67).
2. **PERSONNEL WINCH**
   Mounted on a tripod leg; its cable is the retrieval line to the entrant (page 66). A rope MA system can do the same job (page 60).
3. **3-WAY RESCUE SRL**
   A second, independent line: fall arrest with a built-in retrieval mode (page 69).
4. **HARNESS WITH YOKE OR WRISTLETS**
   Both lines connect to the entrant's harness; a yoke or wristlets keep the entrant narrow and upright (page 68).
5. **LEG CHAIN OR STRAP**
   Keeps the tripod feet from spreading.
6. **ATTENDANT**
   Stays outside, keeps contact and runs the winch.

OSHA RETRIEVAL REQUIREMENT

For permit-required confined spaces, OSHA 1910.146(k)(3) requires retrieval systems whenever an authorized entrant enters, unless the retrieval equipment would increase the overall risk or would not help a rescue. For vertical spaces deeper than 5 ft, a mechanical device must be available to retrieve the entrant. General guidance only — follow OSHA 1910.146 or 1926 Subpart AA, your permit program and each manufacturer's instructions.

FEATURED TRIPOD & RETRIEVAL // SHOWN LARGE

A complete tripod system with rescue SRL, and a two-speed rescue winch.

VENTILATION CHECKS

- Set blowers upwind of the opening and away from engine exhaust.
- Use explosion-proof blowers and statically conductive ducting where flammable atmospheres are possible.
- Duct fresh air down to the work zone and keep it running; ventilation does not replace air monitoring.
- An MVP keeps the opening clear for the retrieval line while the duct runs into the space.

BASKETS · BREAK-APART · ROLLABLE · BACKBOARDS · BRIDLES

LITTERS & TRANSPORT

Steel and plastic basket stretchers, break-apart litters you can carry in two halves, rollable stretchers for confined space, carbon spinal boards, lifting bridles, flotation and patient comfort items.

Junkin | KONG | Skedco

PICK THE LITTER // BY THE PLACE YOU'RE GOING

PACKAGE BEFORE YOU MOVE

Pad voids, secure the patient at chest, hips and legs, protect the head and face, and use a foot loop or stirrups for vertical raises. Insulate from the ground and from wind with blankets — hypothermia starts early.

RIGGING THE LITTER

A lifting bridle with adjusters levels a horizontal litter; a vertical litter rigs from the head. Add a flotation collar or FLOK-IT kit before any water operation. Inspect welds, mesh and rails before every use.

FEATURED LITTERS // SHOWN LARGE

A shell litter shown rigged on its bridle, and a rollable stretcher for tight spaces.

KONG

911 ARMOR

SWIFTWATER

Throw bags and floating line, the KONG Swift Water Rescue Personal Kit, the NRS rescue board, an ice rescue suit, line-capture tools, knives and dry bags. Water helmets and gloves are in Head, Eye & Hand.

NRS | KONG | PMI | Mustang Survival | Rescue Source | Scotty | Singing Rock | Dorcy

WATER RESCUE // REACH, THROW, ROW, GO

The order teams use to choose a method: each step further out puts the rescuer closer to the hazard. This page shows where the gear in this section fits; it is not a procedure.

1
TALK
Direct the person to self-rescue from shore.

Voice, whistle, hand signals

2
REACH
Reach from a stable position on shore.

Reach poles, line-capture tools

3
THROW
Get floating line or a flotation device to the person.

Throw bags (page 78)

4
ROW
Use a board or boat; trained teams only.

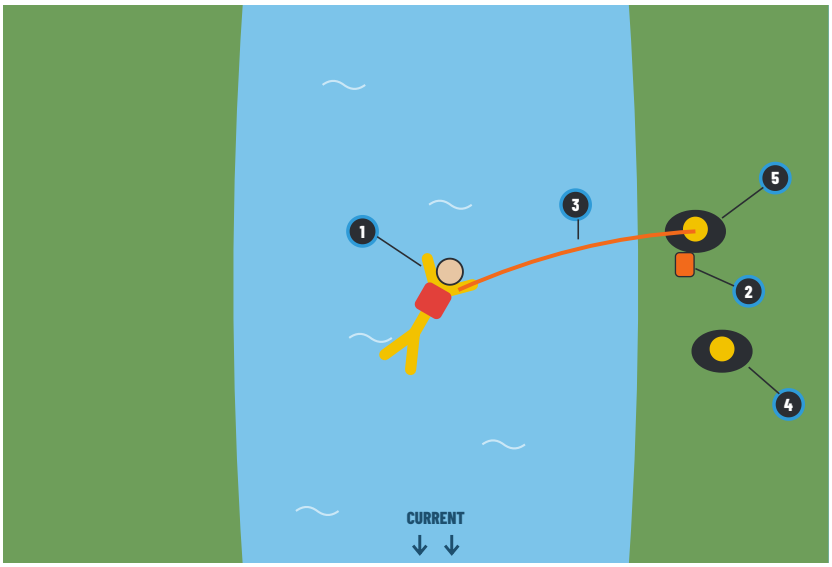
NRS rescue board (page 78)

5
GO
In-water contact rescue; highest risk, trained swimmers only.

PFD, helmet, suit, knife

Shore-based methods Boat and in-water methods

WHERE A THROW BAG FITS



1. **PERSON IN THE WATER** — The reason for the throw: get floating line within reach.
2. **THROW BAG** — The bag holds the line and carries it out when thrown.
3. **FLOATING LINE** — Floats on the surface so it stays visible and reachable.
4. **SECOND RESCUER** — Teams assign backup and downstream positions in their plan.
5. **THROWER ON SHORE** — Stays on shore, out of the water.

FOLLOW QUALIFIED INSTRUCTION AND AGENCY PROCEDURES

This page is general orientation only, not training. Moving water injures and kills rescuers. Water rescue techniques must be learned from qualified instructors (NFPA 1006 / NFPA 2500 water rescue levels) and carried out under your agency's procedures. Wear a rescue PFD and water helmet whenever you work near moving water.

DIAMETER	MBS (MAKER)
10 mm	19.1 kN

FLOATS

Floating polypropylene sheath over a polyamide core; red/yellow high-vis, 51 g/m. For flood, ice and swiftwater throw bags and tag lines, not life-safety rope systems. Not NFPA certified.

COLORS 1

Red/Yellow

LENGTH 15 m or 100 m

ITEM # V0-ARM-411423-15M / -100M

ALSO FOR THE WATER

- Water helmets (EN 1385) and rescue gloves are on pages 18 and 22.
- Throw-bag rope is for throwing and shore-based tasks. The NRS NFPA bag's 3/8 in. GrabLine is rated 14.6 kN — below the 20 kN (T) and 40 kN (G) minimums for life safety rope. A rope system needs every component rated for that system.
- Floating litters: add the Junkin flotation collar or KONG FLOK-IT (page 75).
- Water rope systems: Z-drag kit, swiftwater pulley and water-rescue carabiners are on pages 60 and 58.

TOILET SYSTEM · PRIVACY SHELTER · WASTE KITS · REFILLS · HYGIENE

FIELD PORTABLE SANITATION

When an earthquake, hurricane or flood takes out water and sewer, a deployed team still needs a clean, private latrine on day one. The Cleanwaste GO Anywhere system puts the whole latrine in one backpack, and the consumables keep it running for the length of the deployment.

Cleanwaste | **Reliance** | **Potty Pack** | **Adventure Ready** | **GoGirl** | **XMRE**

THE WHOLE LATRINE // IN ONE BACKPACK

The Cleanwaste GO Anywhere Portable Toilet System: toilet, privacy shelter, waste kits and a padded pack with separate compartments for clean and used kits.

CLEANWASTE

GO ANYWHERE PORTABLE TOILET SYSTEM

CAPACITY	SYSTEM	KITS	SHELTER
500 LB	19 LB	15	6′ 6″

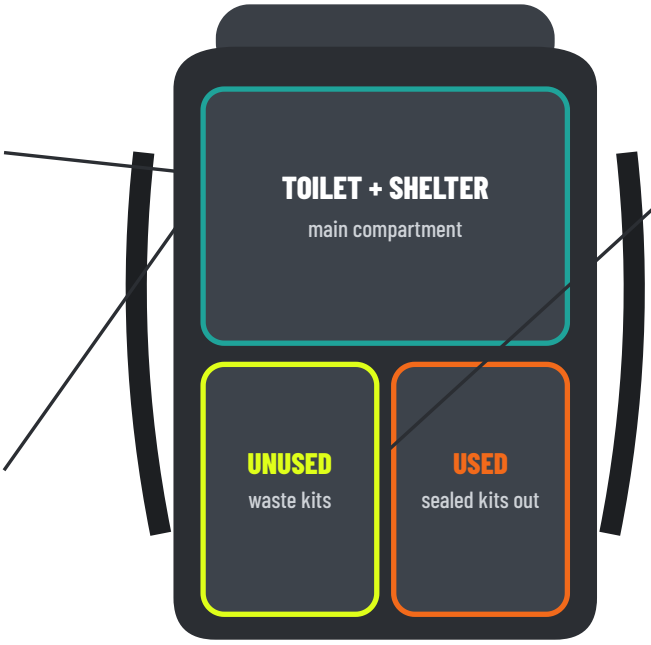
Toilet, privacy shelter, 15 waste kits and a padded backpack — one package.

- Folding GO Anywhere toilet supports up to 500 lb and sits at standard toilet height with a standard bowl size
- 6 ft 6 in floorless privacy shelter — doubles as a private shower enclosure
- 15 GO Anywhere waste kits included; each gels solid and liquid waste and controls odor
- Padded, adjustable backpack with separate compartments for used and unused waste kits
- No holding tank or plumbing — deploy at a base of operations, staging area or work site

ITEM # VO-LM-358013

FOLDING TOILET · 500 LB

6 FT 6 IN PRIVACY SHELTER



15 WASTE KITS

gelling powder, TP & hand wipe in each

WHY TEAMS DEPLOY IT // DAY ONE TO DEMOB

Deployed teams often arrive where water and sewer are down. A latrine you can carry in, set up and pack out keeps the base of operations clean and the team healthy.

1. **PICK THE SPOT**
   Downhill and downwind of food, water and sleeping areas; firm, level ground.
2. **UNFOLD THE TOILET**
   The GO Anywhere toilet folds flat to 5 × 19 × 14 in. and opens to full height.
3. **LINE IT**
   Set a WAG BAG or Double Doodie bag in the bowl; the powder inside gels waste and controls odor.
4. **POP THE SHELTER**
   Snap poles, no assembly. Stake and tie the ground flaps in wind; hang supplies in the mesh pocket.
5. **SEAL & STOW**
   Zip the inner bag into its outer bag. Used kits go in the used compartment of the pack.
6. **DISPOSE**
   WAG BAG kits are landfill-approved under the maker's guidance; follow local and host-nation rules.

BUILD IT OUT OR REPLACE PARTS

Each part of the system is sold on its own, so you can add privacy stations, replace a damaged shelter or keep a spare toilet in a vehicle without buying another full system.

CLEANWASTE

GO ANYWHERE PORTABLE TOILET

CLEANWASTE

GO ANYWHERE PRIVACY SHELTER

6 FT 6 IN

Floorless 4×4 ft, flame-retardant nylon; doubles as a shower stall.

ITEM # V0-LM-358014

PRIVACY & DIGNITY

A private, enclosed latrine matters on long deployments with mixed teams. The shelter has screened windows with privacy flaps and a sealable top flap for a shower hose or light. Add the GoGirl female urination device (page 86) for standing use in the field.

PACK WITH IT

- Spare waste kits: 12- or 100-packs (page 85), or Double Doodie bags with Mini Poo Powder.
- Poo RePAIR deodorizer for the shelter and the used-kit compartment.
- Hand hygiene at the latrine: Clean Capsule soap and towelettes; Potty Pack kits for vehicles and go-bags.
- Light for night use: a headlamp or lantern from page 80 — the shelter top flap takes a hanging light.
- Stakes and ropes are included; add sandbags or extra stakes for high-wind sites.

CONSUMABLES & REFILLS // KEEP IT RUNNING

Waste kits, bulk gelling powder, deodorizer, toilet paper, personal hygiene and field meals.

PLAN YOUR WASTE KITS

Kits needed = people × days × uses per person per day. Set the uses per day for your team; the table shows examples at 1 and 2. Waste kits come in 12- and 100-packs. With your own bags, one 55-use tub of Mini Poo Powder treats up to 21 oz. per scoop.

People	Days	Uses/day	Kits	Order
4	7	1	28	1 × 100-pack
4	7	2	56	1 × 100-pack
4	14	1	56	1 × 100-pack
4	14	2	112	2 × 100-pack
10	7	1	70	1 × 100-pack
10	7	2	140	2 × 100-pack
10	14	1	140	2 × 100-pack
10	14	2	280	3 × 100-pack
20	7	1	140	2 × 100-pack
20	7	2	280	3 × 100-pack
20	14	1	280	3 × 100-pack
20	14	2	560	6 × 100-pack

Example figures only — not a recommendation for your team. Use counts vary with diet, climate and mission.

VERTEX OUTFITTERS · TRAINING

TRAINING COORDINATION

Vertex Outfitters coordinates specialized safety, rope access, and technical rescue training through qualified training providers and experienced instructors. Programs are arranged according to customer requirements, existing qualifications, operational responsibilities, and applicable safety standards. Vertex also assists organizations with sourcing the equipment needed for training and field operations.

FALL PROTECTION & RESCUE AT HEIGHT

- OSHA-aligned fall protection training and practical workshops
- Rescue-at-height skills and emergency response procedures
- Customized workshops for personnel working at height, within their existing qualifications and responsibilities

CONFINED SPACE ENTRY & RESCUE

- OSHA-aligned confined space rescue training
- Practical confined space rescue workshops
- Confined space rope rigging and rescue techniques

TECHNICAL ROPE RESCUE

- NFPA 1006 technical rescue operations and technician-level programs
- Personal rope rescue skills training
- Rope techniques involving aerial ladders
- Customized technical rescue programs and practical skills workshops

SPRAT ROPE ACCESS TRAINING

- SPRAT rope access training and evaluation
- Training conducted at a specialized facility in Rhode Island
- Courses coordinated through qualified rope access instructors and independent evaluators
- Training at other locations may be arranged separately through qualified providers

PPE INSPECTION & EQUIPMENT TRAINING

- Competent PPE Inspector training
- Inspection procedures and equipment familiarization
- Manufacturer-specific equipment training and practical applications
- PPE Inspector training available at a Rhode Island training center or an appropriate customer location
- Competent Inspector certificates issued by KONG Italy

SPECIALIZED TRAINING

- Potential specialized instruction involving advanced rescue equipment and techniques through international manufacturer instructors
- Program availability, instructional scope, and location subject to individual coordination and confirmation

TRAINING COORDINATION & EQUIPMENT SUPPORT

Vertex Outfitters works with customers to identify training objectives, coordinate qualified instructors and training providers, and source associated safety and rescue equipment. Training content, prerequisites, certifications, locations, scheduling, and pricing are confirmed for each engagement. Training and certifications are delivered by qualified external providers, not Vertex Outfitters.

Rescue equipment is only as safe as the training behind it. Product information is general guidance taken from manufacturer data; always follow each manufacturer's instructions, NFPA 2500 and your agency's policies. Specifications can change — vertexoutfitters.net has the current listing. Vertex Outfitters is a DBA of GreyStone Group LLC.
