PMI® Hira Women’s Rope Access Harness

This harness is designed to follow anatomy of the wearer. The Silhouette Waist belt of this harness has few differences. Contoured Hip Angle Narrower at the waist and flared at the hip to conform to a woman’s body, so that it rides low and secure on the bony structure. Fem-Curve profile that gently curved waist belt silhouette doesn’t dig in below the ribs. Furthermore, it has Reduced Height Front Risers so, front leg loop risers are only 4.5” from bottom of waist belt to top of leg loop – the shorter rise keeps the harness waist belt from coming up too high on the woman’s body and maintains the leg loops in position. Hira harness is well-suited for many job types and environments. Modern anatomical design of this harness with high attention to detail for comfort and features allows you to wear this harness all day long while working at height. This harness is ANSI/ASSE Z359.11-2014 made with high quality materials and designed to give you years of performance.
