VERTEX OUTFITTERS
GO WHERE OTHERS WON'T

WELCOME

READY FOR THE WORST DAY ON THE JOB.

Vertex Outfitters supplies spill response gear to emergency managers, public works, airports, marinas, parks, schools and industrial sites across Maryland, Virginia and beyond. Products ship direct from the manufacturer to your site.

Tell us what you need to cover — a fuel island, a fleet, a shoreline or a lab — and we'll help you match the right kit and absorbent to the job. Email **info@vertexoutfitters.net** or call **301-246-2336**.

CHOOSE YOUR ABSORBENT

UNIVERSAL

Gray. Absorbs oils, coolants, solvents and water. The everyday choice for shops, plants and maintenance areas.

OIL-ONLY

White. Absorbs oil and fuel but repels water, so it floats. Built for outdoor spills, rain and waterways.

HAZMAT

Yellow. For acids, bases and unknown liquids. Yellow signals a hazardous spill to everyone on scene.

BE READY BEFORE IT HAPPENS

SPILL KITS

Pre-packed kits put the right absorbents, PPE and disposal bags in one place, from grab-and-go bags for truck cabs to 95-gallon wheeled drums for fuel islands, loading docks and airport ramps.

PAIR IT WITH A REFILL

Every 95-gallon kit has a matching contents-only refill (see page 10), so you can put the kit back in service the same day after a spill or inspection. Outfitting several sites? Email info@vertexoutfitters.net for volume pricing.

INSIDE A 95-GALLON KIT

What comes in the drum, and what each piece is for.

1. **OVERPACK SALVAGE DRUM**
   X-rated, DOT-approved 95-gallon drum stores the kit and can hold used sorbents or a leaking container.
2. **SEALED LID**
   Twist-on, double-wall lid with a closed-cell gasket keeps the sorbents sealed and dry until needed.
3. **WHEELS AND HANDLE**
   Two 6" polyolefin wheels and a built-in handle let one person roll the kit to the spill.
4. **150 PADS**
   15" x 19" pads wipe up and absorb puddles, drips and splashes.
5. **7 PILLOWS**
   18" x 18" pillows soak up larger pools in a small footprint.
6. **18 SOCKS**
   3" x 4' and 3" x 8' socks ring the spill to keep it from spreading.
7. **PLUG & DIKE**
   Three tubs of epoxy putty seal small leaks in drums and tanks.
8. **PPE AND DISPOSAL**
   Nitrile gloves, goggles, disposal bags, Emergency Response Guidebook, label and tamper-proof seals.

SIX STEPS OF SPILL RESPONSE

1 PROTECT
Put on gloves and goggles before you approach.

2 STOP THE SOURCE
Upright the container, close the valve or seal the leak with Plug & Dike.

3 CONTAIN
Ring the spill with socks and protect nearby drains.

4 ABSORB
Work pads and pillows from the outside edge in.

5 DISPOSE
Bag used sorbents. Dispose of them under the local, state and federal rules for the liquid absorbed.

6 RESTOCK
Order a refill so the kit is ready for the next one.

SIZE IT RIGHT

Pick a kit that absorbs at least as much as the largest container or tank in the area it protects.

PLACE IT CLOSE

Stage kits where spills start — fuel islands, generator pads, drum storage, loading docks and vehicles.

RESTOCK FAST

Refills put your kit back in service the same day after a spill or inspection.

REFILL & RESTOCK

Keep every kit inspection-ready.

WHY REFILL?

After a spill or an inspection, a refill restocks the same absorbents, PPE and disposal bags that came in the original kit, so you reuse the drum or cart you already own. Order a refill with every large kit and keep it on the shelf.

WHICH FORM DO YOU NEED?

PADS

Flat sheets for drips, puddles, wipe-downs and lining work areas. Most are perforated so you use only what you need.

ROLLS

Long runs for walkways, under equipment and along leaking lines. Tear or cut to length.

SOCKS

Flexible tubes that ring a spill or wrap the base of drums and machines to stop the spread.

PILLOWS

High capacity in a small footprint for pooled liquid, sumps and drips under equipment.

BOOMS

Long, linkable socks for outdoor spills and water. Oil-only booms absorb oil and repel water.

ABSORBENT PADS // UNIVERSAL

Gray pads for oils, coolants, solvents and water.

ITEM #	TYPE	ABSORBS	SIZE	SOLD AS
VO-SPT-C-BOOM10-50	—	n/a	50' L x 10" H	1 boom

HOW BOOMS WORK

Absorbent booms soak up oil. Containment booms hold it in place.

OIL-ONLY SOCK/NET BOOM

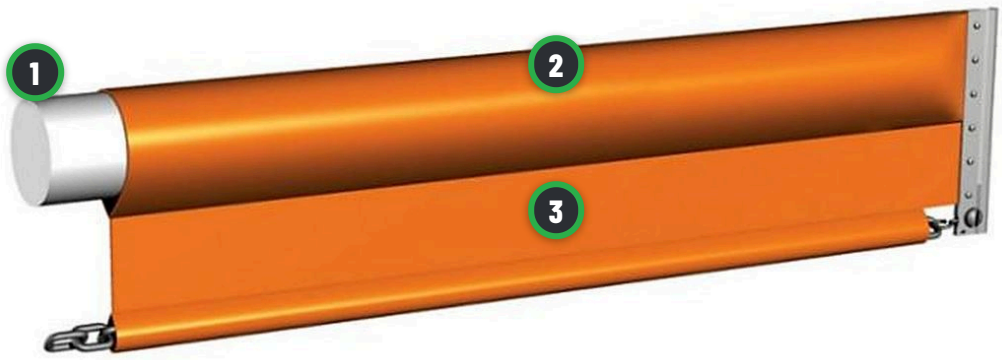

1 MESH OUTER SLEEVE
A strong mesh sleeve encases the sock skin for strength when wet and heavy.

2 POLY-BLEND FILLER
Absorbs oil and other hydrocarbons while repelling water.

3 END CONNECTOR
Links one boom to the next to build a containment line of any length.

4 OPPOSITE CONNECTOR
Each boom connects at both ends, so runs can be extended or closed into a ring.

CONTAINMENT BOOM (NON-ABSORBENT)

1 ROUND FOAM INSERT
The internal foam float keeps the boom riding on the surface.

2 4" FLOAT
Sits above the waterline to form a barrier against floating oil and debris.

3 6" PVC SKIRT
Hangs below the surface to help keep spills from creeping underneath. Comes pre-assembled for quick deployment.

USE THEM TOGETHER

On calm water, a containment boom corrals the slick and keeps it from spreading or drifting. Oil-only booms, sweeps and pads then soak up the oil inside the barrier. The containment boom is built for calm water and low current.

CONTAIN & PROTECT

Secondary containment and storm drain protection.

COIR DRAIN DEBRIS FILTER

- Removes large floatables, sediment and debris from runoff
- Cut sections to fit almost any drain; secures to the top of the grate

ITEM #	TYPE	ABSORBS	SIZE	SOLD AS
VO-SPT-CDF2721	—	n/a	27" W x 21' L x 1.5" H	1 roll

HOW IT WORKS

INLET DRAIN FILTER

1 FABRIC SHELF
Starts removing pollutants as soon as runoff enters the drain.

2 FILTER RING
Pulls oil from stormwater and channels it to the collection bag.*

3 OVERFLOW PORTS
Let heavy flow pass so the drain does not back up and block.

4 FILTER STRIPS
Help capture hydrocarbons inside the bag.*

5 COLLECTION BAG
Holds sediment and debris so it can be emptied and removed.

*Oil-capturing features apply to sediment, oil and debris models. Illustration shows the inlet filter design; the VO-SPT-DFI36420S frameless filter fits drains 20"–30" W x 20"–36" L.

DRUM SPILL PALLET

1 REMOVABLE GRATE
Polyethylene grate lifts off for quick access to the sump; a drain plug makes emptying simple.

2 66-GALLON SUMP
Captures a leak or spill from stored drums and helps meet containment requirements.

3 ALL-POLYETHYLENE BODY
Lightweight and chemical resistant; the 4-drum pallet holds up to 3,000 lbs. and the 2-drum up to 1,500 lbs.

TRAINING COORDINATION & EQUIPMENT SUPPORT

Vertex Outfitters works with customers to identify training objectives, coordinate qualified instructors and training providers, and source associated safety and rescue equipment. Training content, prerequisites, certifications, locations, scheduling, and pricing are confirmed for each engagement. Training and certifications are delivered by qualified external providers, not Vertex Outfitters.
